

Issues & Suggestions in 20260819 version.

1. The application is not opening in offline in fresh session. i.e. To make it work offline we need to open it in online mode first.
2. It takes 2-3 refreshes to fetch the location, and in some devices, it fetches the last location. Also, even if the device location is on it is saying that need to turn on the location in offline mode.
3. In Online mode, we tried changing coordinates to different beat locations, but the Division Range Beat did not change, we uploaded the sighting, it showed the changed coordinates but the Division Range Beat did not change according to the location. In previous version it was changing the Division Range Beat according to edited coordinates.
4. In Offline mode, it does not showing Division_Range_Beat in final revision before submission even after selecting the Division_Range_Beat from dropdown. Also, when we share that sighting through share option in Nearby Sightings, it also does not show the Division_Range_Beat for offline added sightings.
5. In Nearby sightings, it is not sowing the sightings according to the location. It has some glitch; we have added multiple sightings from same location but we can't see them in nearby elephants. The same sightings are visible in Map option.
6. In Nearby sightings share option the date format is MM-DD-YYYY, it should be DD-MM-YYYY. Also, the we can't see the sighting photo after shared. Also, Description is not visible in share option.
7. In Add Hathi Mitra, The Division_Range_Beat is not syncing according to the location, rather it is showing the Division_Range_Beat of the user beat guard.
8. In Add Villagers, the option should show the added villagers by user. Currently it is showing all added villagers.
9. In Add sightings, In the place of "Attach a Photo" there should be "Take the photo" option and "Attach a Photo" on the place of take the photo. As users are mostly capture the photo in the app, So the "Take Photo Now" should be at prominent position. (Suggestion from field staff).

Eravat Sighting

Sighting type: Direct Sighting

Date: 8/19/2026, 11:22:34 AM

elephants: 2

Coordinates: 23.721572, 81.016953

GPS Location (DMS): 23°43'17.7" N, 81°01'1.0" E

Map: <https://www.google.com/maps?q=23.7215722,81.0169527>
