

Issues & Suggestions in 20260829-2301 version

1. The application is not opening in offline in fresh session. i.e. To make it work offline we need to open it in online mode first. It asked to login again when app is opened in offline mode. Also, it says the number is not registered and contact your admin.
2. We could not add Hathi Mitra, as it says **"Failed to send request to the Edge Function"**.
3. When "back (<)" button of mobile is pressed it directly closes the application. It should redirect to the home screen of the app rather than closing application entirely or it should display warning of "Do you want to exit?".
4. When a sighting is logged in offline mode without selecting the Division_Range_Beat, Post sync it did not chose the correct Division_Range_Beat.

Eravat Sighting

Sighting type: Direct Sighting

Date: 31-08-2026, 14:18

Division: Anuppur

Range: Ahirgawa

Beat: Audhera

elephants: 1

Coordinates: 23.824439, 80.988653

GPS Location (DMS): 23°49'28.0" N, 80°59'19.2" E

Map: <https://www.google.com/maps?q=23.8244393,80.9886534>
